PROJECT EXPERIENCE

MyGallery — A Virtual Art Gallery

- This project is a gallery website for exploring the artwork of various artists, current showings, future events, and a shopping option.
- Artists can log in and update their pages. Customers can log in to use the checkout features. This format encourages the customer to connect with the artist at galleries that are showing their work, where they are publically vending and browsing and buying online.
Technologies used: Java, SpringBoot, ThymeLeaf, MySQL, and Google API for maps.

WORK EXPERIENCE

Community Volunteer — St. Louis, MO

June 2005 - Present

- Successfully manage household including finances, household labor and maintenance, and community/school involvement.
- Community outreach volunteer; plan, prepare and deliver meals and clean clothing, blankets and hygiene supplies to the unhoused members of our community one day per week.
- United Way volunteer. Community Investment Panel Chair.

Corporate Services Specialist — A.G. Edwards and Sons Inc., St. Louis MO

June 2000 - June 2005

- Advised financial consultants on services and strategies for executives of publicly traded companies and business owners.
- Presented, explained and sold concepts to executives including stock option exercise, managing non-qualified deferred compensation plans, diversifying concentrated equity positions and the implementation of 10b5-1 plans.
- Prepared comprehensive plans for closely-held business owners which addressed executive compensation strategies, retirement plan design, business risk management, group benefits, short term cash management, business liquidity, and succession plans.
